

simplicity

smart storage
that supports
agile working

introduction

Businesses around the globe have all been affected by COVID-19 and the restrictions it has placed on the workplace.

Companies are moving quickly to implement new agile ways of working and adopt smart business solutions that will enable a safe return to the office.

With these changes come challenges for management teams who need to ensure workspaces are not only being used efficiently, but that employees and visitors are being kept safe, as well as encouraging productivity and well-being through new workplace design.

Your Workspace has developed a host of new features to help tackle COVID-19 concerns that can help your business return to a new or 'better normal'. With our existing features and benefits, we can also offer our clients a flexible, configurable, and modern smart storage solution to support new agile ways of working.

agile working

creating a better normal

transforming the workplace through agile working

Agile working involves the conscious break down of traditional limitations in the workplace. Dedicated desks and rigid office designs are replaced with innovative and adaptable approaches to workspaces and working practises. Agile working calls for more freedom around how, when and where we work. This modern working style incorporates collaboration with smart technology.

70

% of companies are predicted to transition to an agile way of working by 2021, as a result of COVID-19,* according to Growth Business Magazine

the smart agile office

What are the benefits of agile working?

It has never been easier for businesses to adopt an agile work culture and can benefit both your company and employees.

simplicity

the smart revolution

What is a
Simplicity
smart locker?

When traditional lockers meet the latest technology, reporting capabilities, and bespoke designs that are modular and versatile, a Simplicity smart locker is born.

Our smart lockers provide businesses with a practical storage solution, the integrated software (which is what makes our lockers smart) also offer a whole host of benefits to users and management teams alike.

safer with simplicity

COVID-19 has affected e-commerce globally, with new challenges being faced every day by management teams who need to keep their staff, visitors, and clients safe whilst ensuring business continuity. Simplicity smart lockers can help you satisfy workplace concerns surrounding COVID-19.

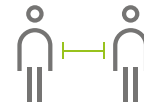

contactless lockers

access your lockers using an employee/building card or via the free smart phone app

remote management

assign, open and release lockers remotely from a single management hub

social distancing

allocate lockers 2 metres apart and proportionally throughout the building

'track and trace'

record the time, date, locker number, locker location and locker user to comply with new government guidelines

cleaning

block lockers for cleaning and notify your house-keeping team with an automatic email when lockers have been used

finishes

we can construct your lockers using materials with antibacterial properties

smart insights

Big on data, Simplicity smart lockers can help you transform your business through our integrated technology.

utilisation

see how often your lockers are being used, to what capacity and in what location to ensure your smart lockers are being used efficiently

data

analyse your building, workspaces, and employee footfall with the integrated reporting function to help make improvements to your corporate real-estate and workplace design

reports

generate reports to support your facilities management strategy

time

with no geographical boundaries and no more keys, smart lockers can be managed across a multitude of locations and floors from one central location

collection lockers

Parcels, letters, laptops, or mobile phones; our collection lockers will provide you with a safe, reliable, and trackable smart solution that will automate your internal mail and company asset management system.

How our collection lockers work:

Our Simplicity locking system is used alongside the MYPUP software.

When an item is delivered it will be placed in an automated locker at the pick-up point.

Once the locker has been closed, the recipient of the item will then receive a message either by SMS or email to say their item is ready to be collected, along with a unique code to provide access.

The software can also send delivery reminders, to make sure the item is collected.
